# Save the earth

NO Pollution

save earth

Do you know why we are quarantine not  
because of COVID-19. because of  
us human's we pollute the air. we kill  
animal's we chop tree's we pick up flower's.

So now we should know how to save the earth by: wash our hands, don't chop trees down, stop killing animals, wash your hands, throw garbage in the trashbin.

guy's it's ok we just need to make  
more friends between human's, plant's  
and animals, what I mean't of throwing  
garbage in the trash bin is because we put  
it in the ocean it will make the ocean dirty.

and lot's and lot's of people will die.

This is why we should respect nature  
our lives depend on nature like in this picture  
so we save our world the end
