East- Second Grade

Name: Lucy

The Last Dragon Egg

You see there once was a planet called Zaidiah. On this planet there were dragons. But scavengers are killing dragons and only one species remains. The species is a Thunderwing. The dragon is about 30 meters long and 80 meters wide.

Name:

Lucy

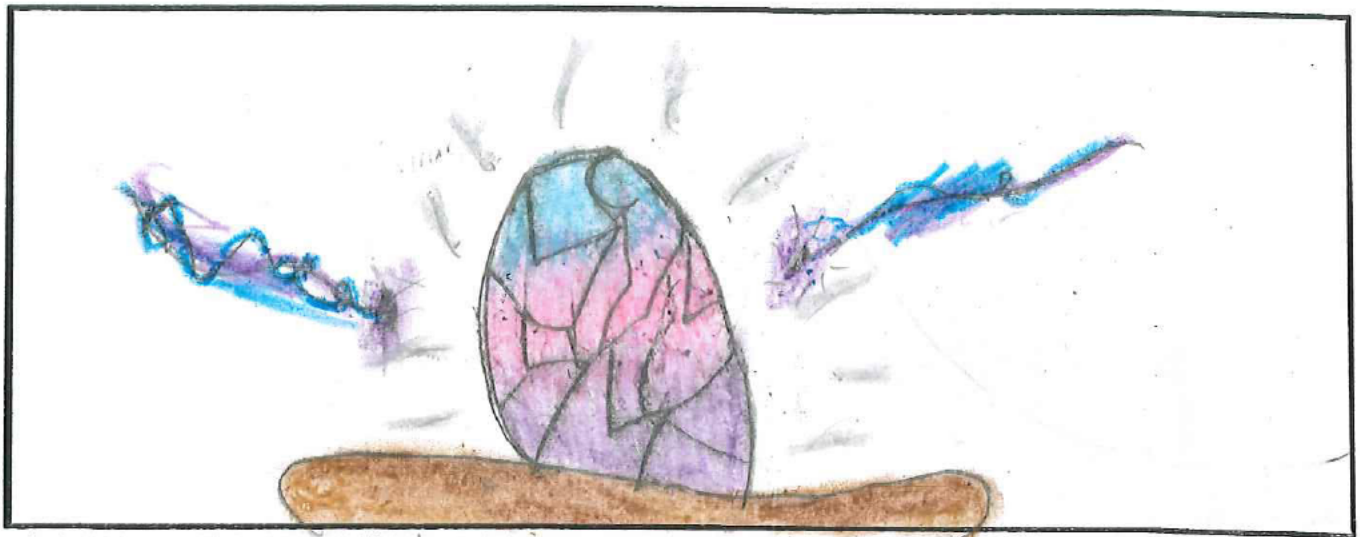

And 300x the size of you. The dragon had an egg and a mate. Arie lost her mate because the humans killed her mate. And Arie has now been asleep for 300 years in her abandoned cave. Arie lived on a mountain in a ginormous

gons won't live. And if Abigail
doesn't hatch there's a
chance that the dragon
Abigail will get infected
and Ariel, Ari, Lauren, and Abigail
will turn into the ghost-
dragon. Yeah, that's right, the
ghost-dragon. The ghost-

dragon is a five-headed dragon
and it takes souls. And some-
times it multiplies into a
dementor. And the only way
to stop it is to shapeshift
into it. That way you and it
teleport into the end. It's
base. There are crystals

That you explode. That way
when you hit it with the
blood moon sword it can't
heal. And when you defeat
it, it turns normal and the
egg hatches into a two-headed
dragon. Then people get brain-
washed and dragons won't die. After

Lucy

that happens, the babies
get magic and they can fly
again.

Name: _____

Facts About Ghost-dragons

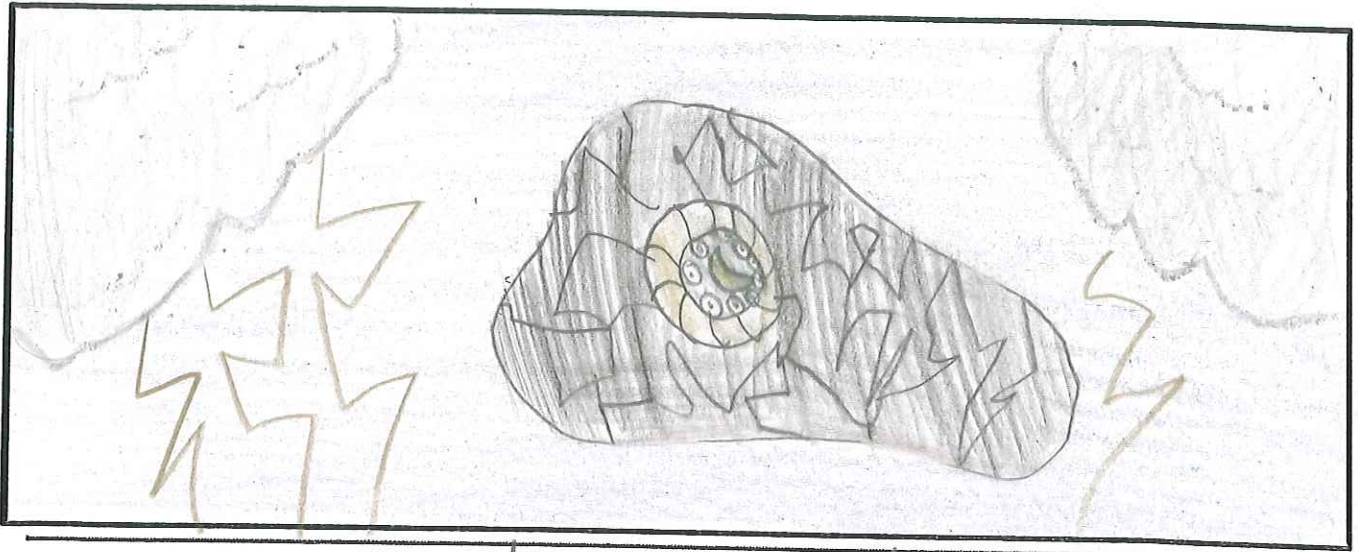

Without magic, dragons are unprotected and can catch the Furious ghost virus. They are called ghost-dragons because they can go invisible! They are 100 meters long and 10,000 meters wide! When they're angry, their mouth turns into a
