

My Awesome Adventurous Future

By: Zahra Mateen

My awesome future will make a difference in this world. I want to be a doctor so everybody can be so happy. I like to care about people who are feeling sick. To make sure they don't feel sick I make sure they get some medicine and if they still don't feel well I can let them stay here at the hospital until they feel better. My other passion would be an explorer like Dora. I will travel to the forest and meet lots of cool animals like birds, snakes, and alligators. When I get older and do these things I think I would enjoy it because it was my dream and it came true.

The hospital

The rainforest
