Mak with a Helping Hand

the birds

Once upon a time there was  
a tooth named Mak.

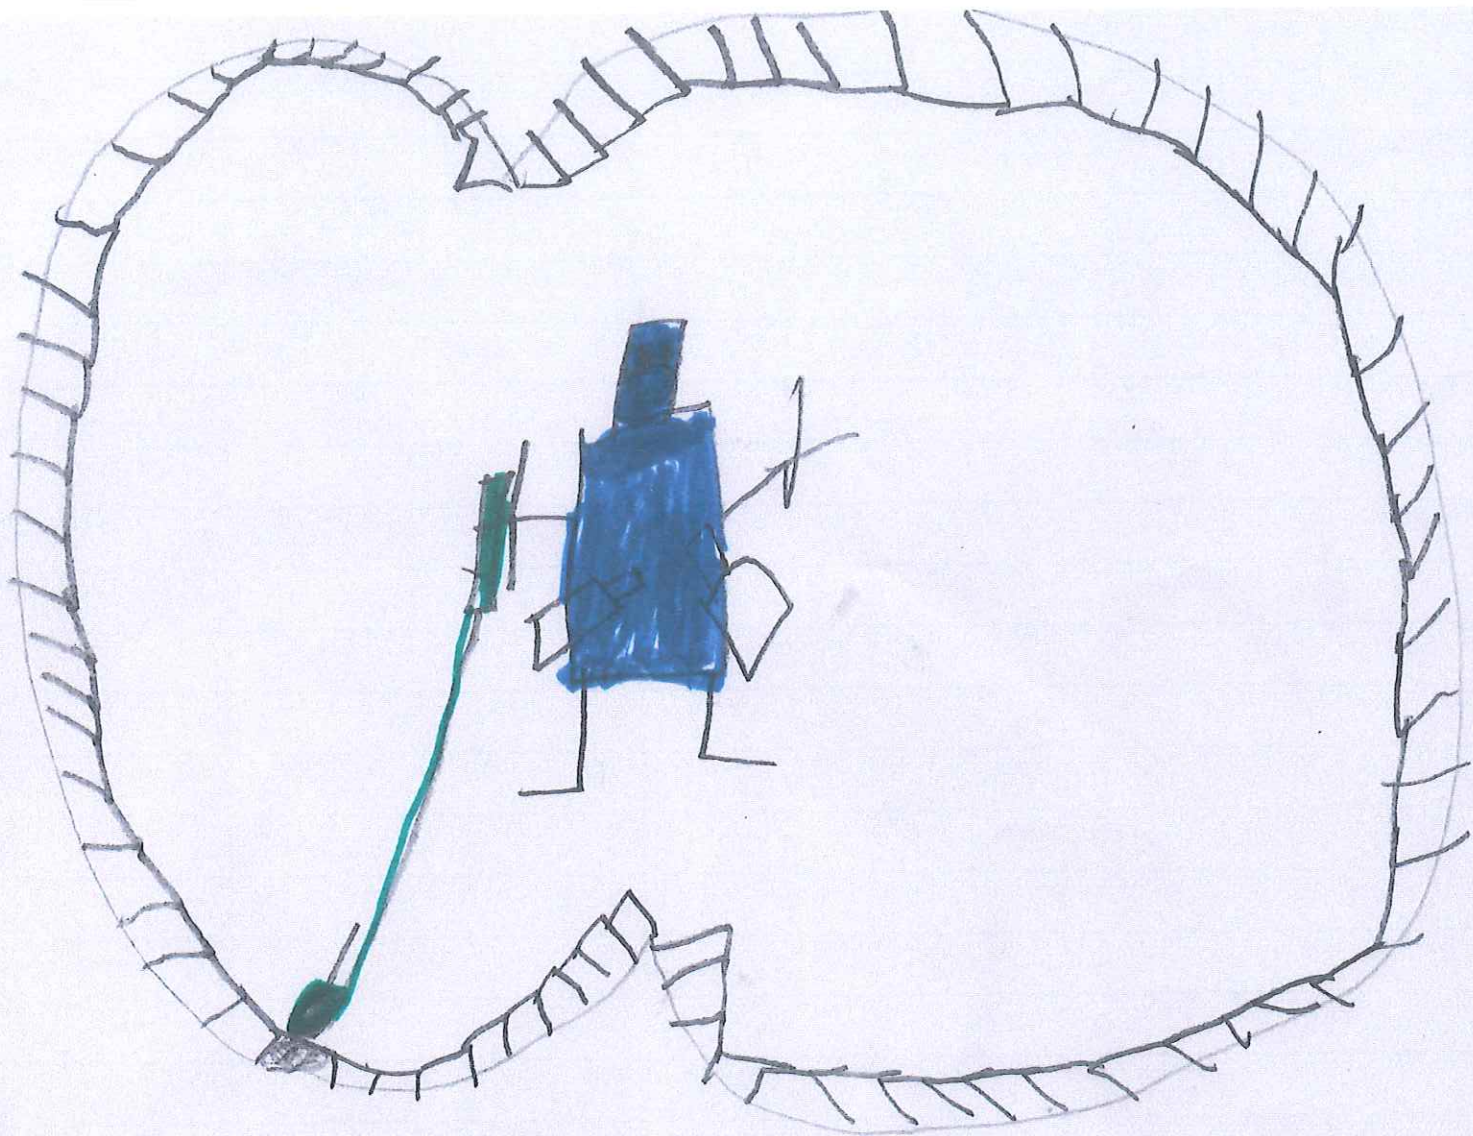

He was being attacked by  
plaque!

Tooth + Plaque = Cavity

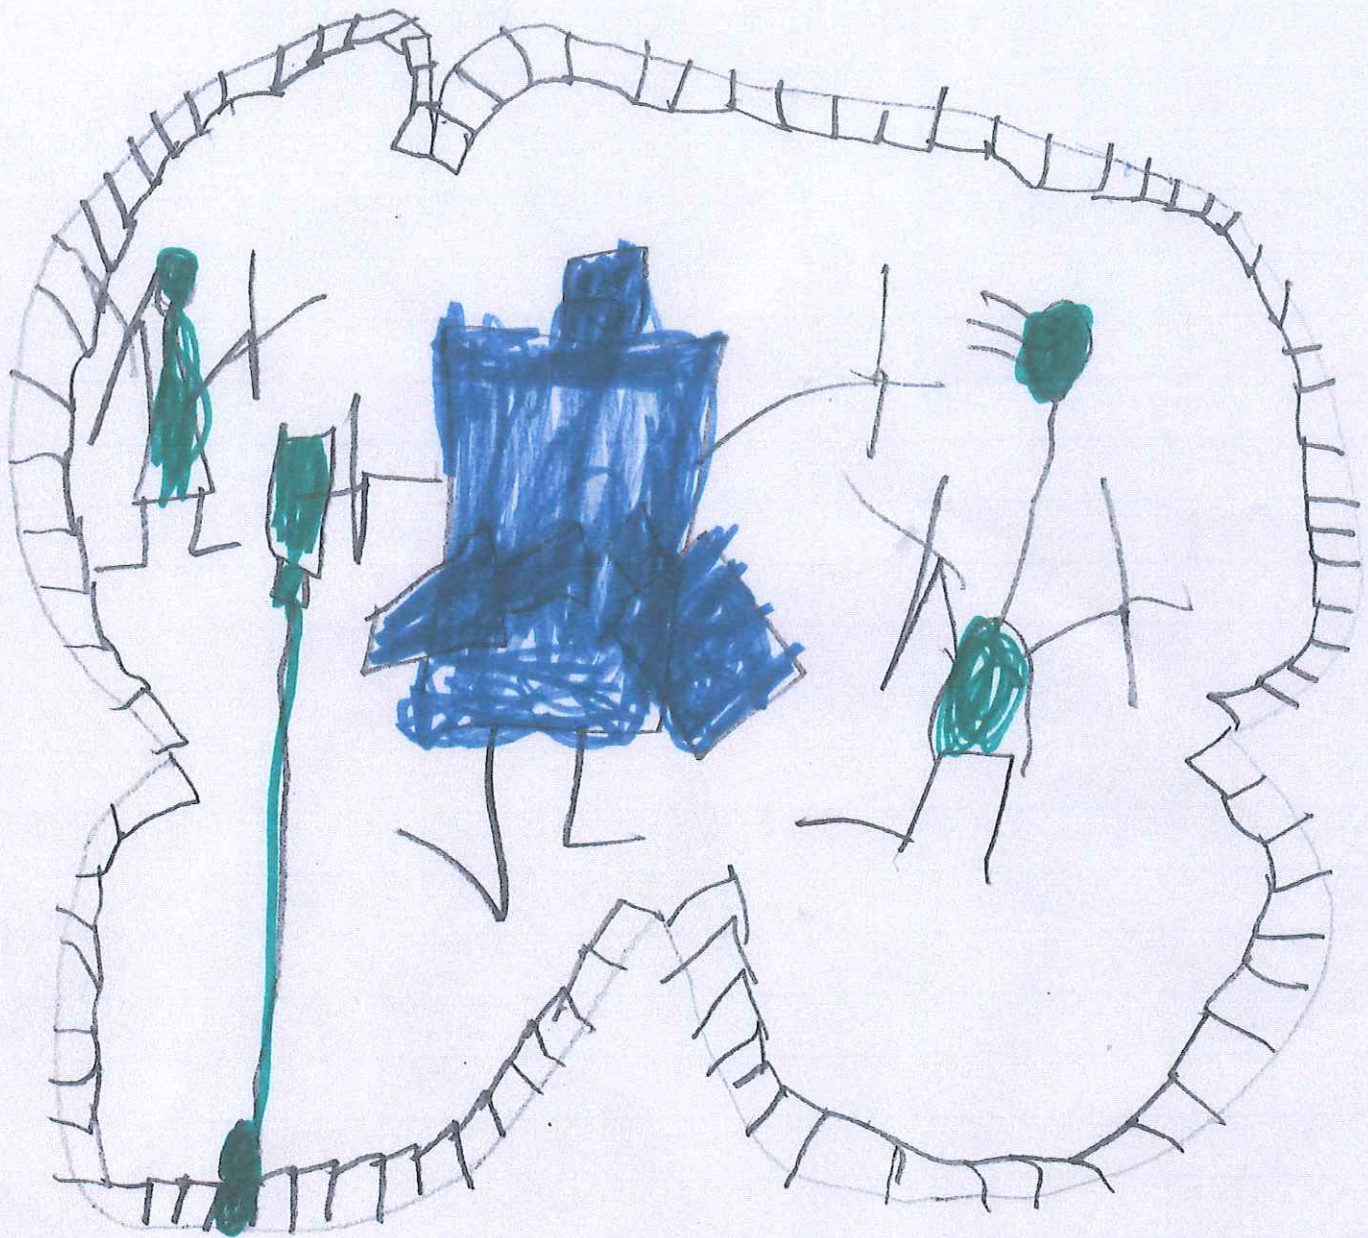

Cavity + Dentist = Filling

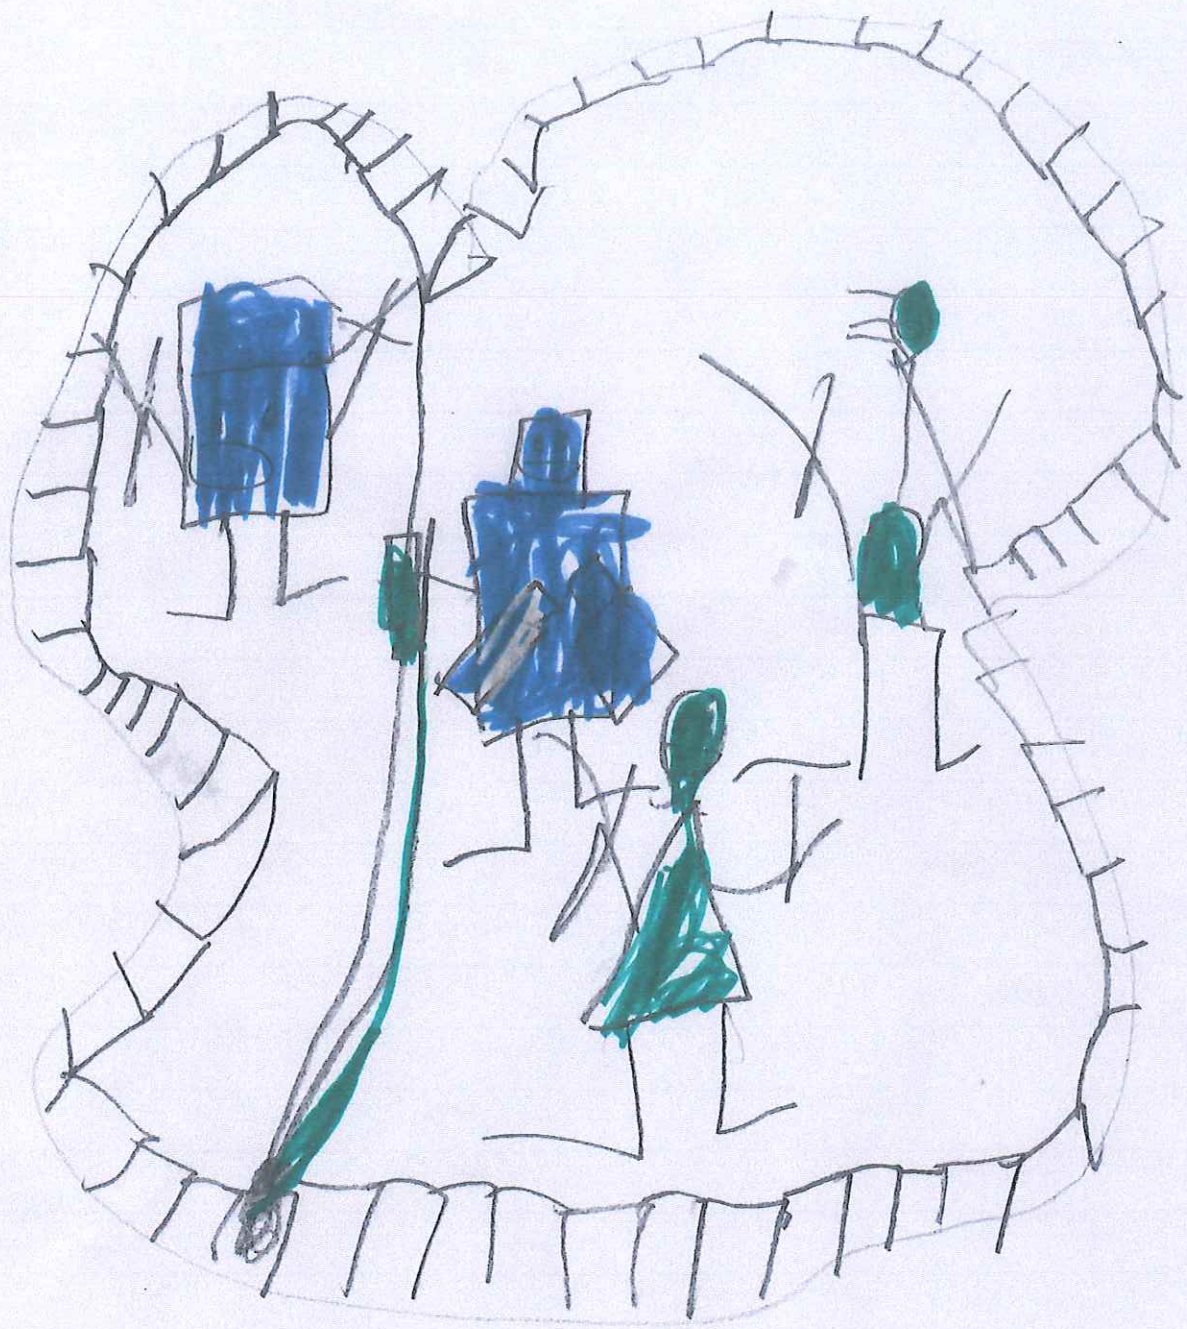

Just then Super mouthwash came  
but even mouthwashes' super  
mouthwash power wasn't  
enough. He needed backup.

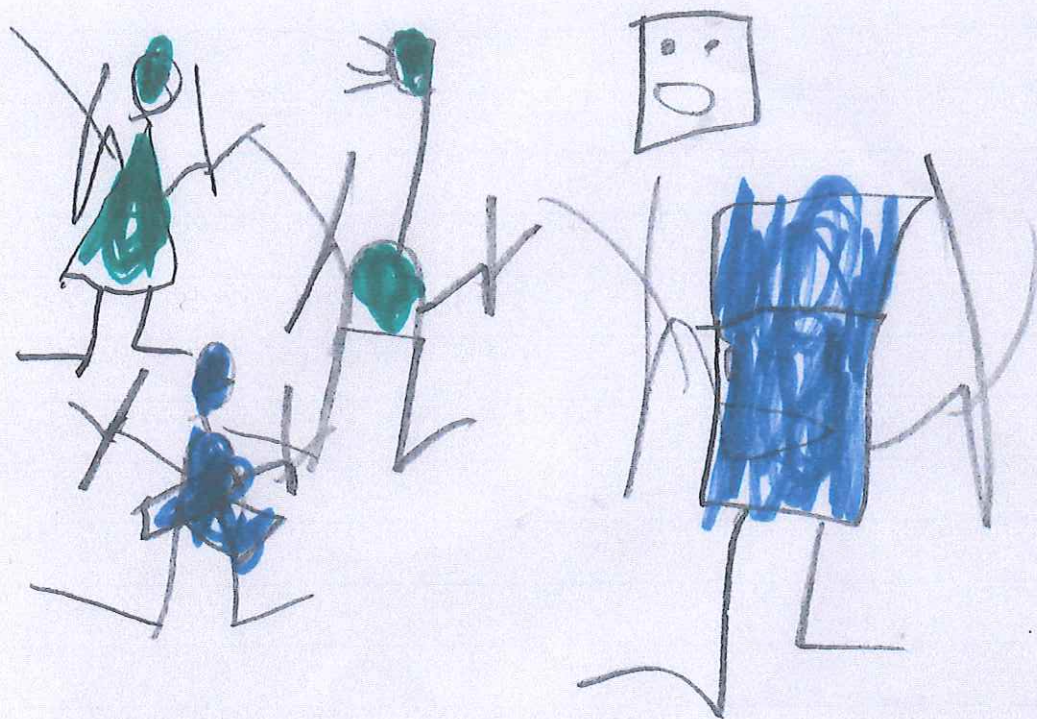

So Mak called super toothbrush  
and super toothpaste, but even  
that wasn't enough.

So Max called Super floss  
and that did it!

---

Mark was saved! The end.
