by
Luna

There were once three sister kitties who wanted to go to space.

Joe

Tiny

Grape

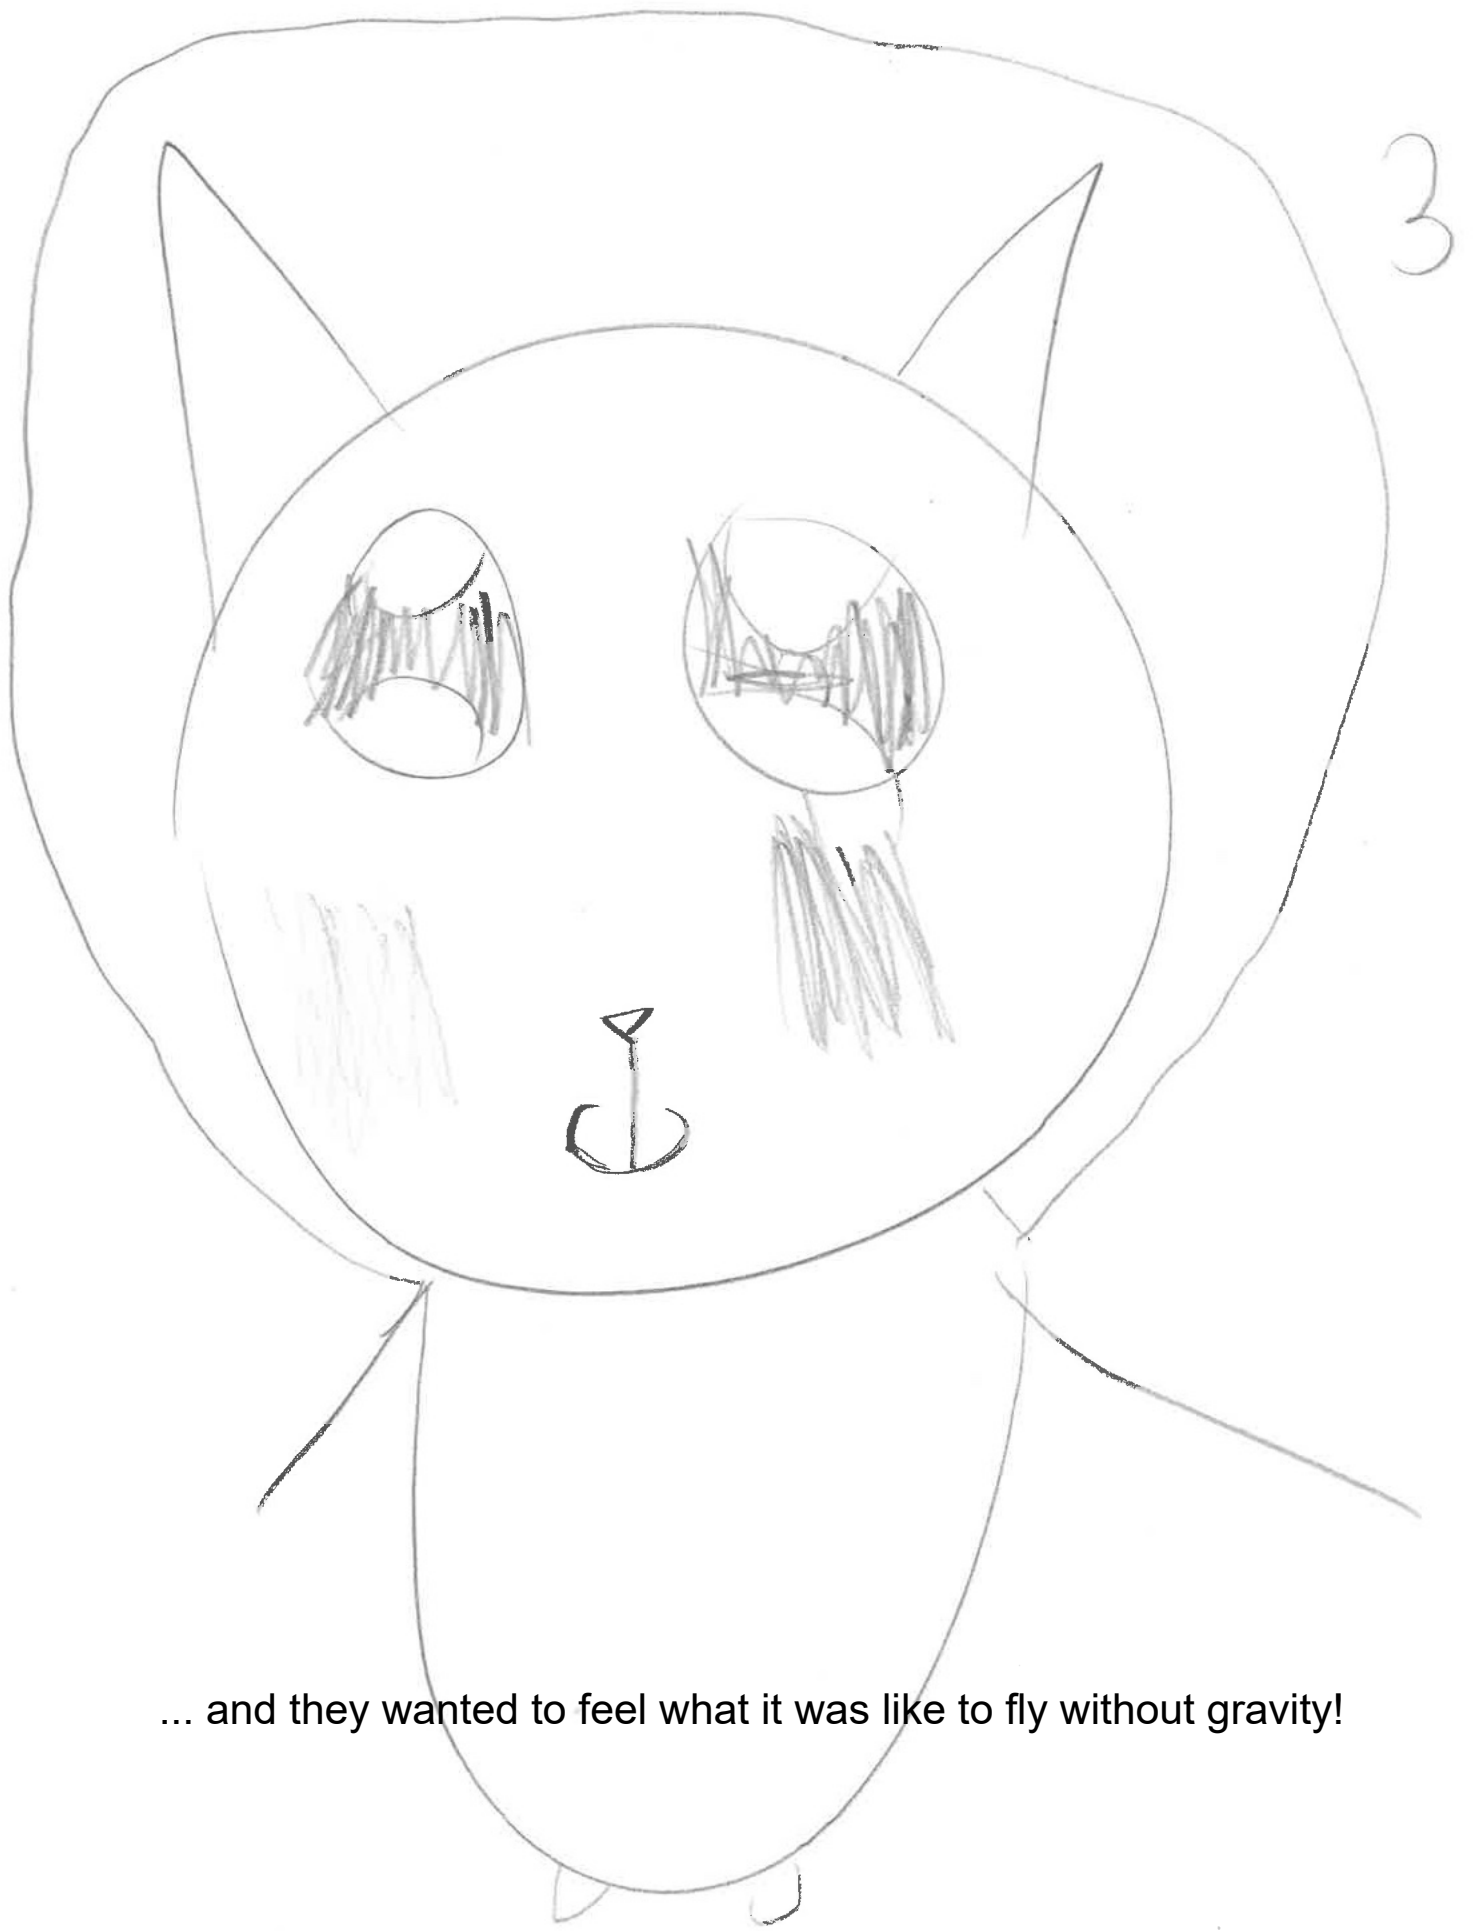

They wanted to go to space because they wanted to fly space rockets!

Squeak!

... and they wanted to feel what it was like to fly without gravity!

They also heard the moon was made of cheese, and mice love cheese...
and kitties love mice!

Instead of cows, they dreamed of mice jumping over the moon.

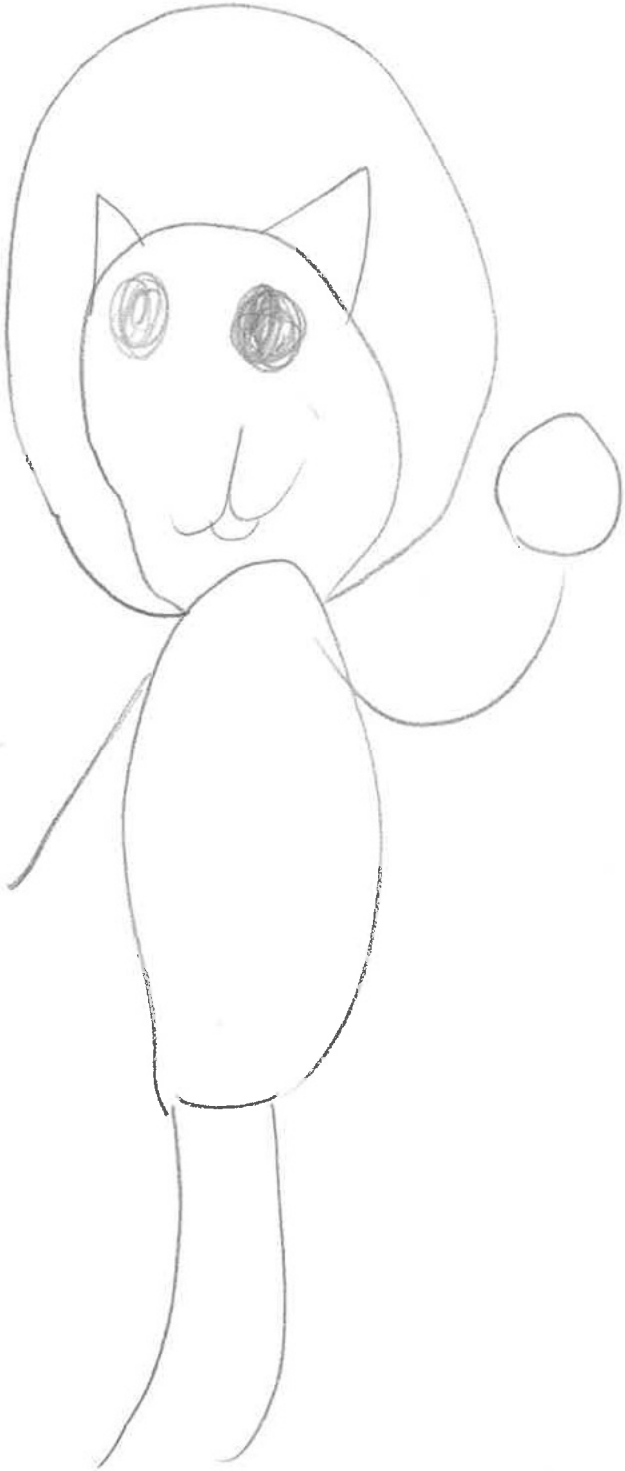

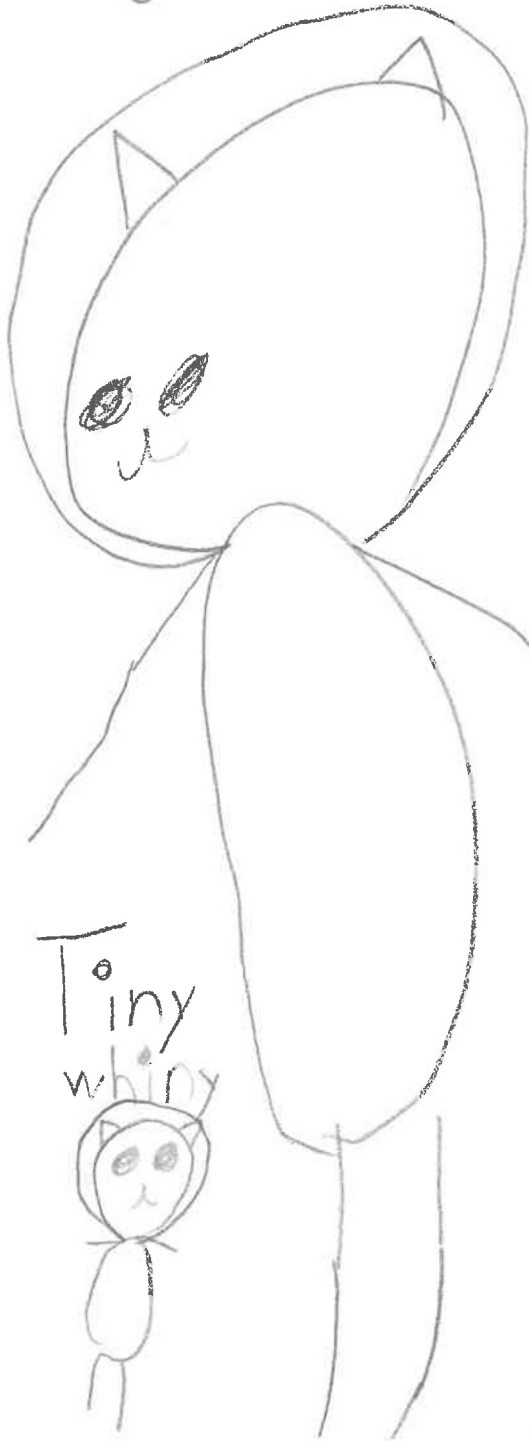

How do kitties become astro-cats?

They study space! They learn about stars and planets and spaceships.

so someday they can fly off in thier own spaceship...

And float without gravity like balloons...

and hunt mice on the moon!
