

Lisa

THE
DREAM
MAKER

by: luna

Lisa, a peculiar 12 year old with orange hair and freckles all over her face, went to sleep very excited because each dream was better than the previous one. In her dreams she creates rockets, spaceships and go to saturn, time machines to travel in time to the jurassic era:

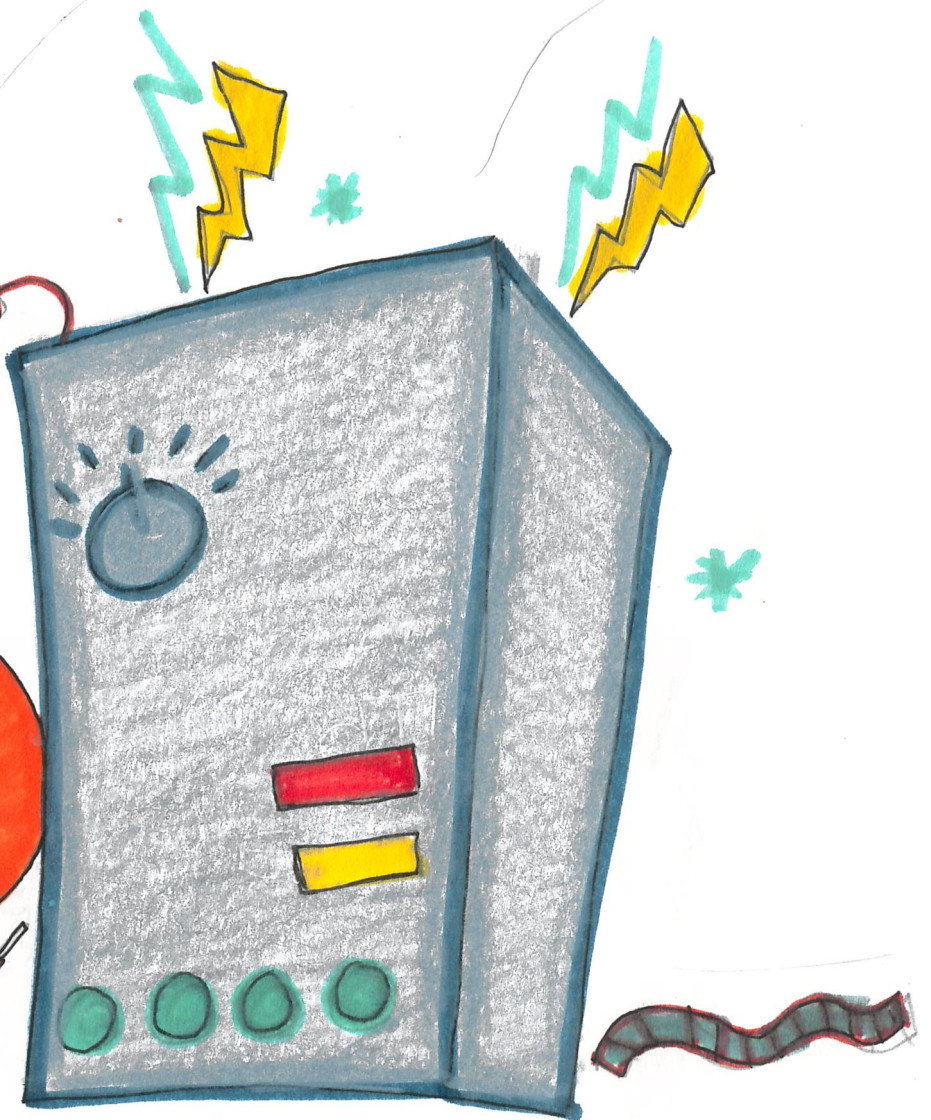

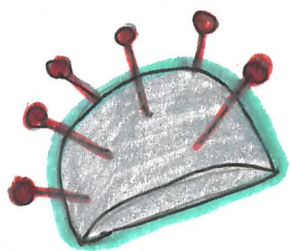

During the day, Lisa enjoyed telling her friends about every dream of hers. Her group of 4 friends were amazed but somewhat sad, because they could not dream anything similar to what Lisa dreams.

After a few days thinking, Lisa had an idea, she was willing to create a "Dream Maker" after 9 days and 8 nights and a lot of effort, the machine worked by typing on the computer the desire dream and a lot of sparks ⚡ and colorful lights, the information reached a very funny looking helmet that the children had to put on their heads for a few seconds

while the dream was recorded on them.

The Dream Maker was ready

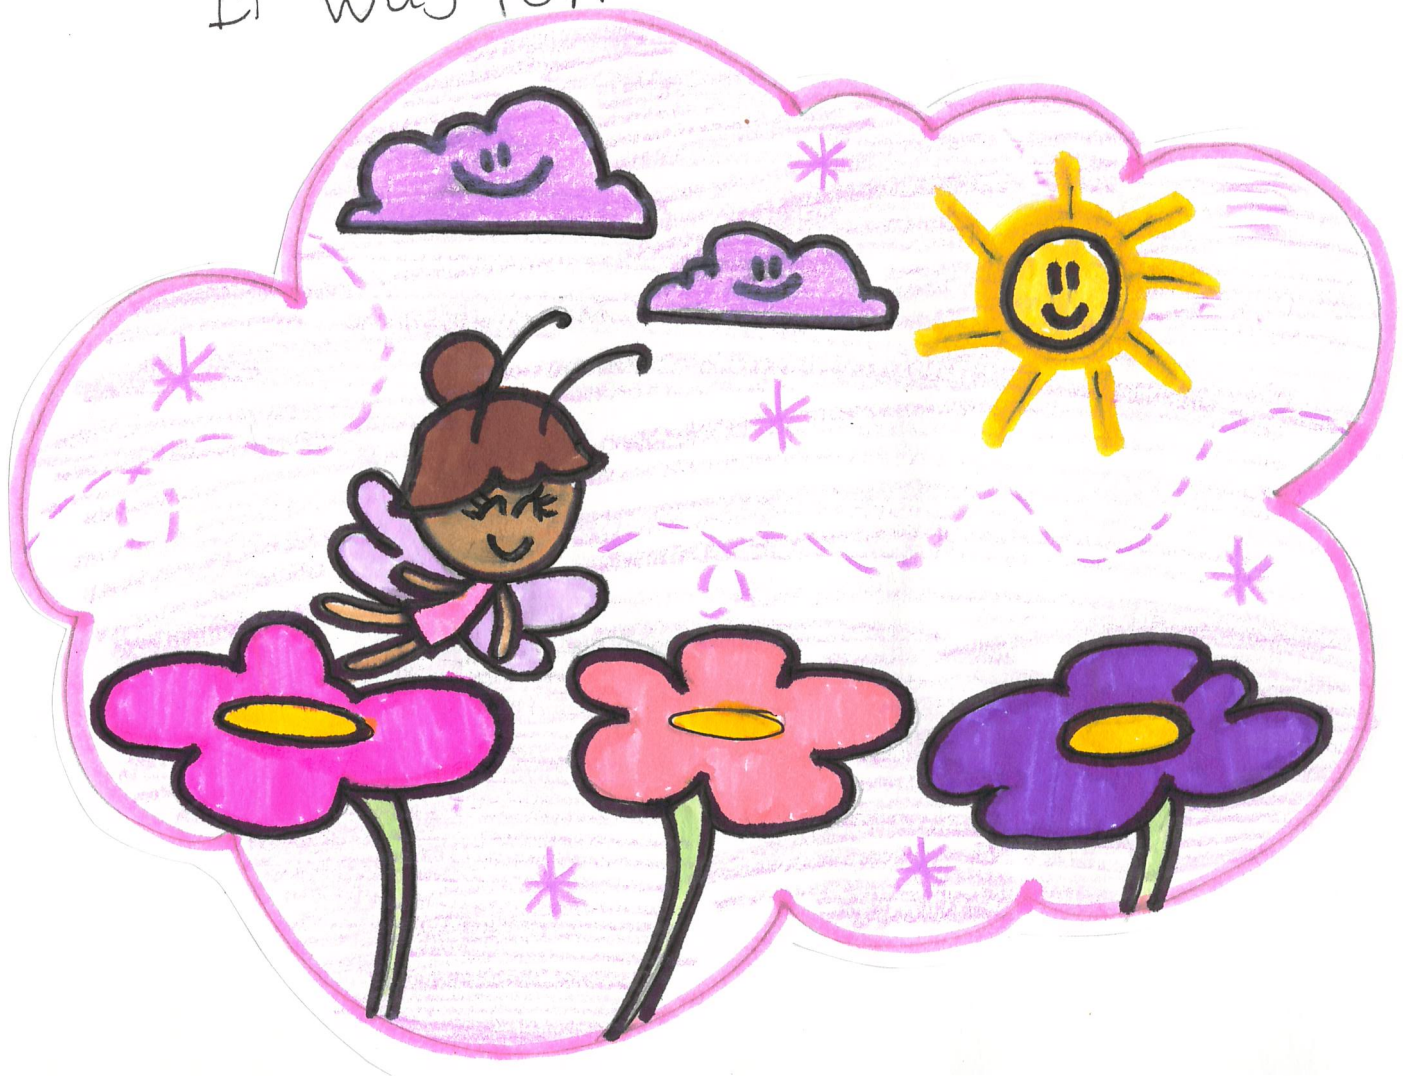

The first one to try the wonderful Dream Maker was Jonathan, a boy with messy, curly hair who wanted to go to the moon.

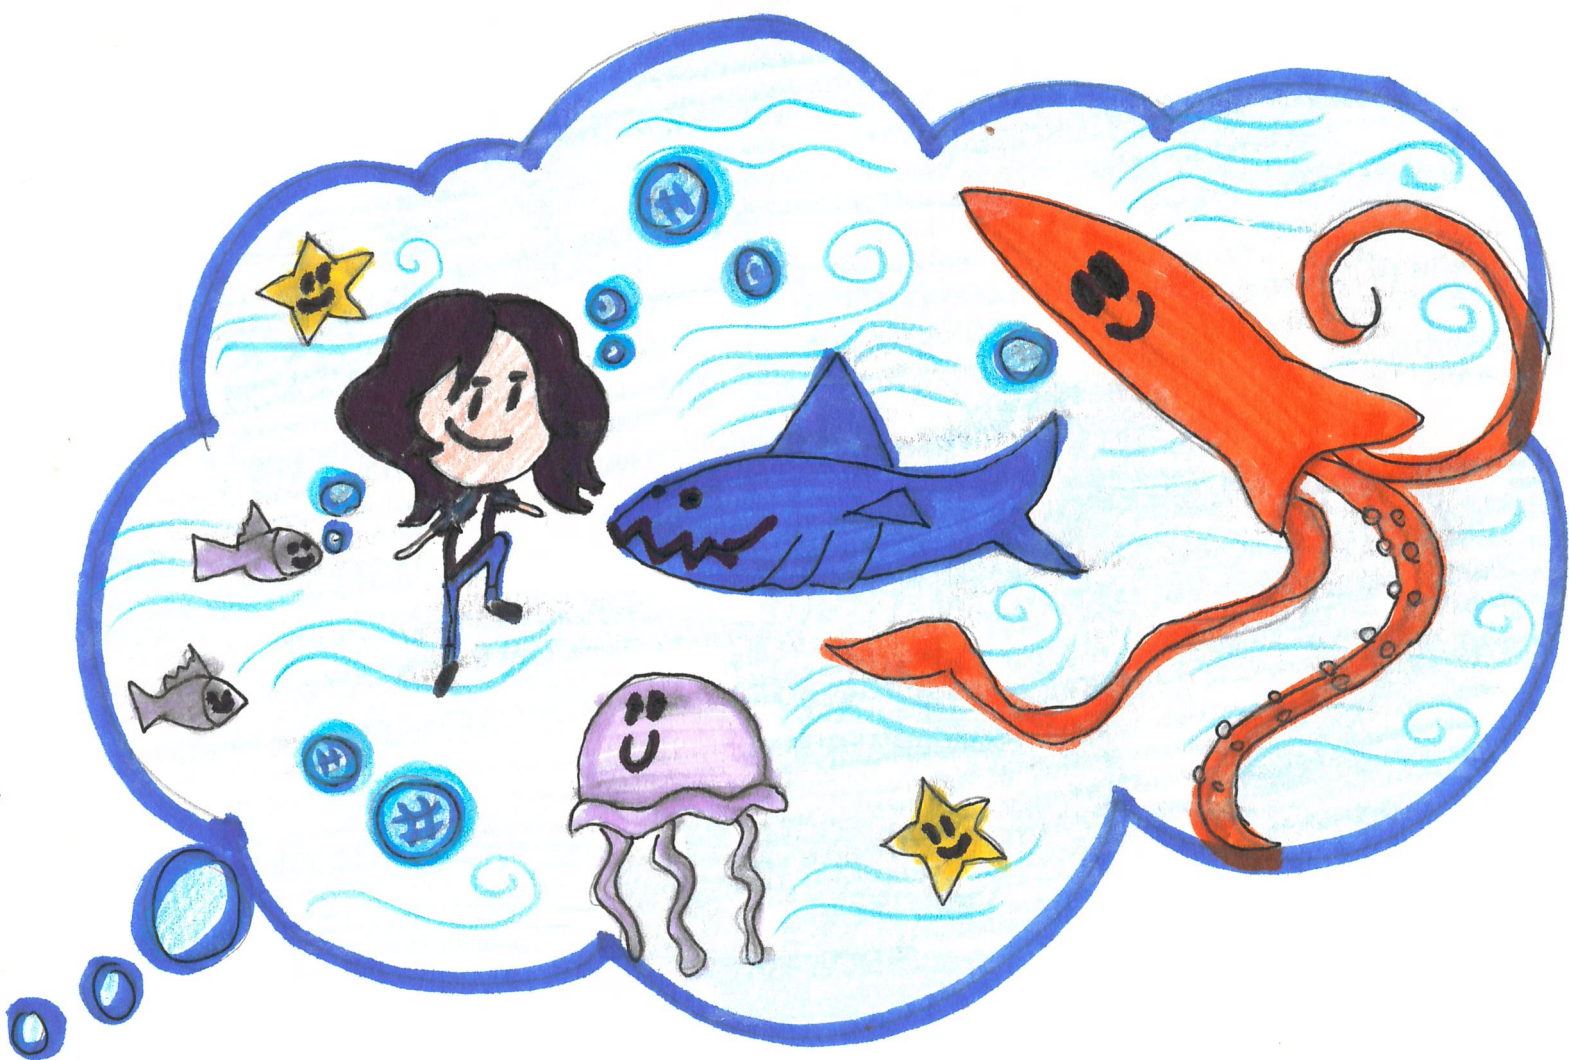

In his dream he met
alien creatures and was
able to explore the universe.
Jonathan liked it so much.

The next one was Emma.
a thin little girl with long
hair, she was the youngest
in the group and the most
sensitive, she dreamed
of being a dancing fairy,
Delicate and full of glitter,
flowers and pink things
that she liked most.
It was fun.

Days later, it was Jude's turn, a chubby boy with blue eyes, who wanted to fly over the city, fly like the birds between the clouds and the rays of the sun. And his dream was exactly what he expected.

Finally, Gabriel, the tallest of them, with tousled hair and big brown eyes dreamed of what he asked, to be swimming among sharks, jellyfish, seastars and giant squids, enjoying corals and the blue tones of sea.

Everything was perfect, until the children wanted so much for it to be reality and not just a dream.

Lisa spent the entire night thinking about how to create a machine that would make dreams come true. It was when she realized what she was able to achieve.

Lisa created a "Dream Maker" just like she did in her dreams, she was capable of inventing any type of artifact, she did it in real life.

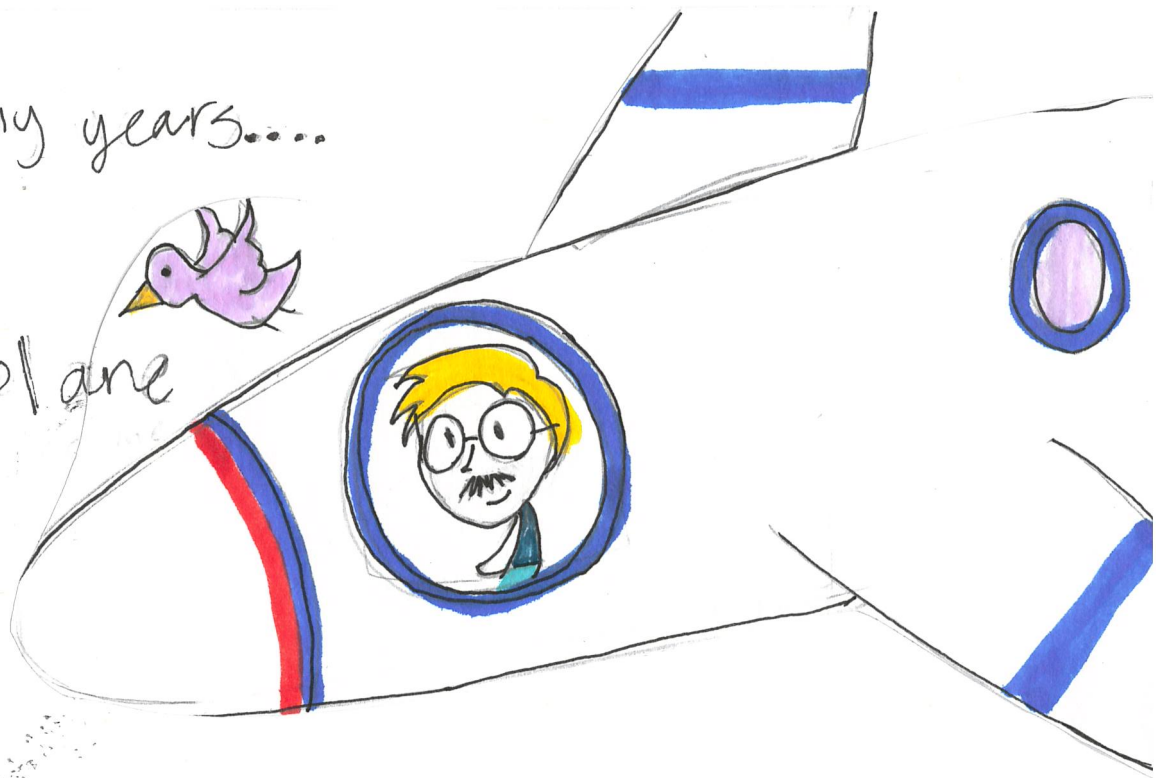

If you wanted very much, if you put love, effort and dedication...

Dreams do come true

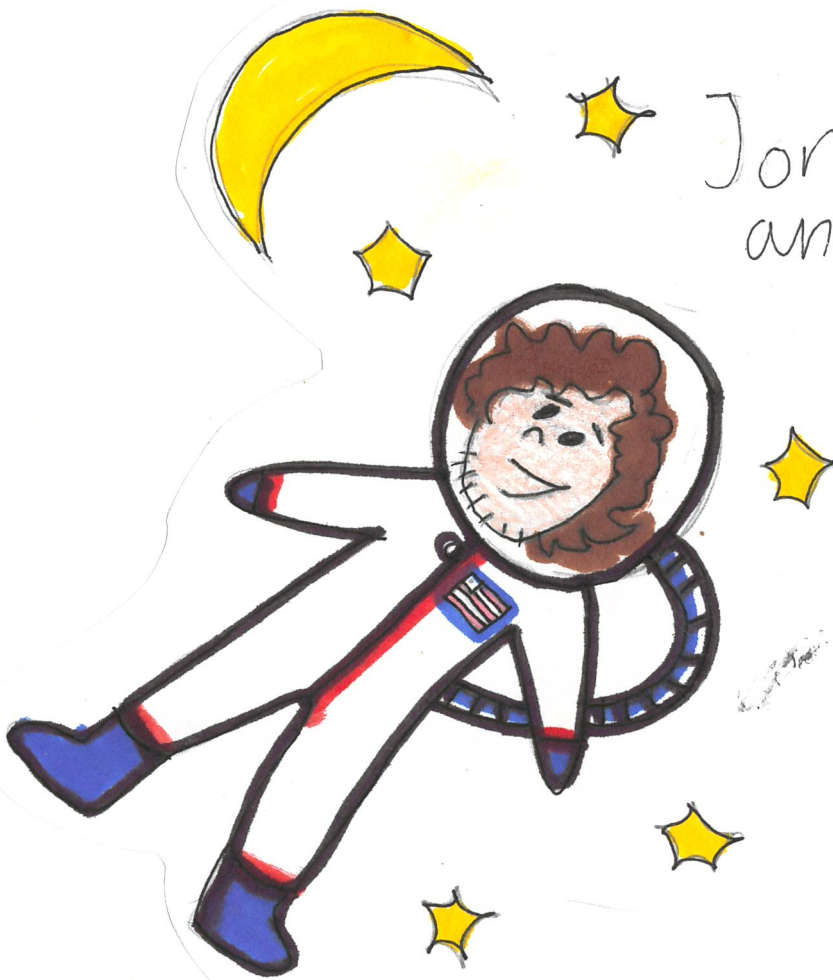

After many years....

Jude flew his plane through the clouds, he became an Aviator pilot.

Jonathan became an astronaut.

Emma who with her delicacy and Grace was a ballet dancer, she looked like a fairy, every time she danced and did those pirouettes

Gabriel was a diver
who studied marine life.
dreams do come true.

And I, Lisa, continue
creating spaceships, submarines
and flying machines. Who knows?
maybe, just, maybe one day
my time machine will be ready
and I cannot only tell you
but take you to see dinosaurs
with me and my little helper
boop ☺
