STEM Works: Carson Tahoe Health

At Carson Tahoe Health, quality control nurse Taryn Peirce uses data to make sure patients stay safe while at the hospital. What safety rules are in place at your home or school to keep people safe? Pick a safety rule and use the data table below to collect data on how often this rule is followed. See if you can determine whether the safety rule keeps people healthy and safe. If not, what new rule would you create to make the people in your life safer?

Safety rule: _____

(ex: washing hands during flu season)

Data Collection:

<i>Example: Tuesday: 25 out of 30 classmates report washing their hands before every meal</i>	<i>Example: Thursday: 7 students absent due to illness</i>

Outcome:

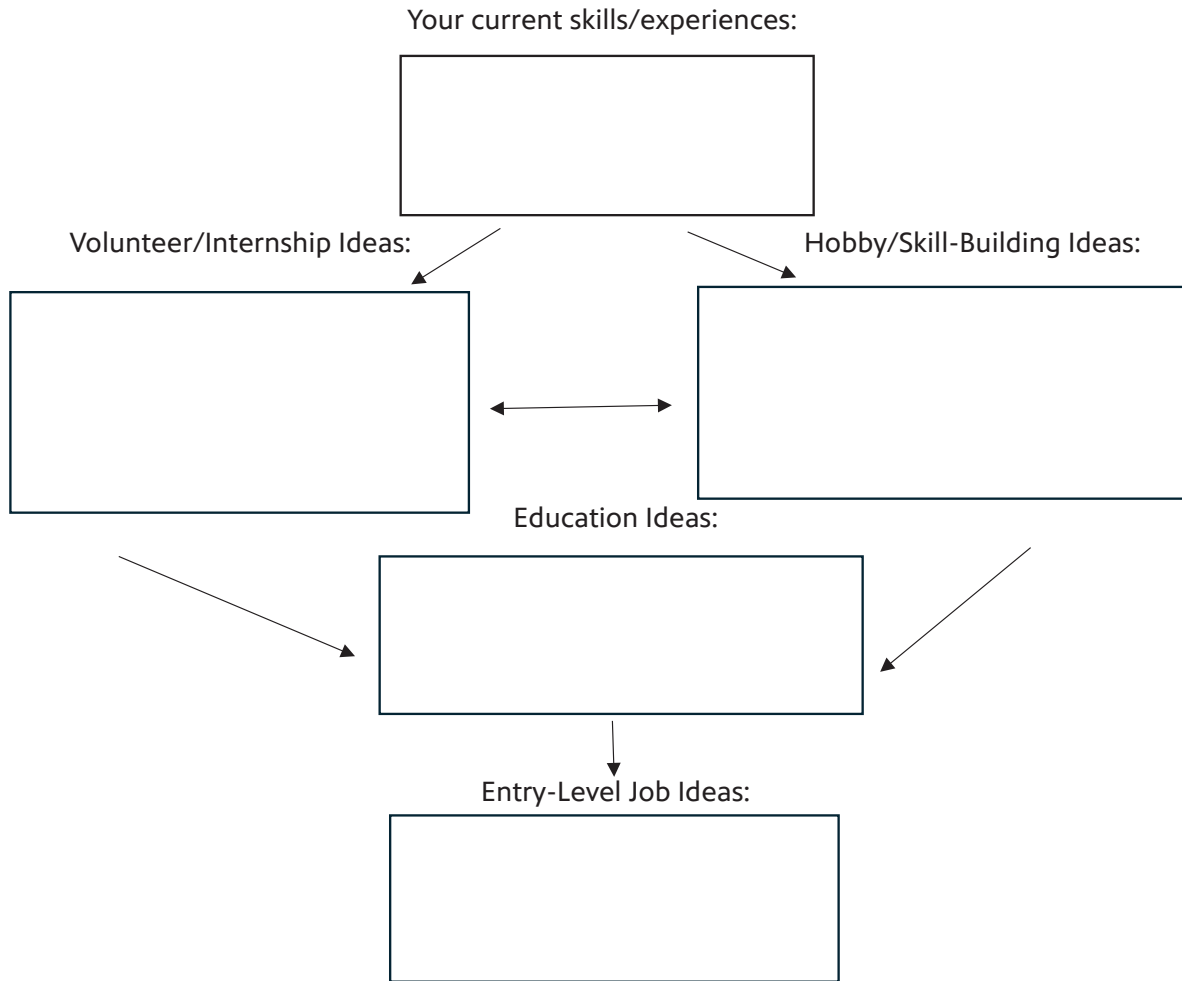

Do you think this safety rule is effective? How would you make it better?
