

Lisa's

Queen

6 Once upon a time, there was  
12 a tiny kingdom. Its citizens, the  
18 Tinsys, were very happy and had  
24 a good queen. But, as time  
30 passed, the queen grew too old  
36 to rule the kingdom. She needed  
42 to find a new ruler. The  
48 queen decided to hold a contest.  
54 In her time, there had been  
60 a dinosaur skeleton discovered and she  
66 wondered if there were any still  
72 living. It was said that the  
78 dinosaurs lived with a unusual collection  
84 of animals. "If somebody finds a  
90 dinosaur, he or she shall become  
96 ruler of the kingdom."

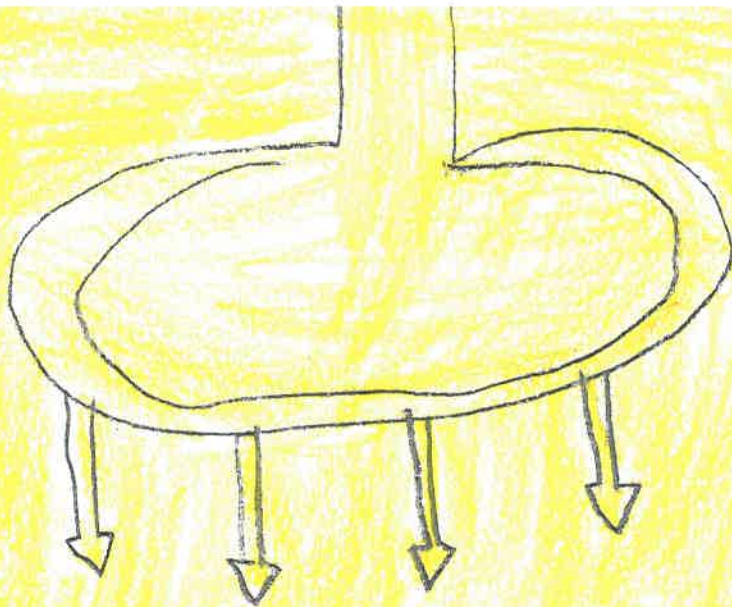

"If someone finds  
a dinosaur he or  
she will become  
ruler of the  
kingdom"

00 Lots of Tinys attempted to win  
06 the contest, but they all failed.

Did you find one?

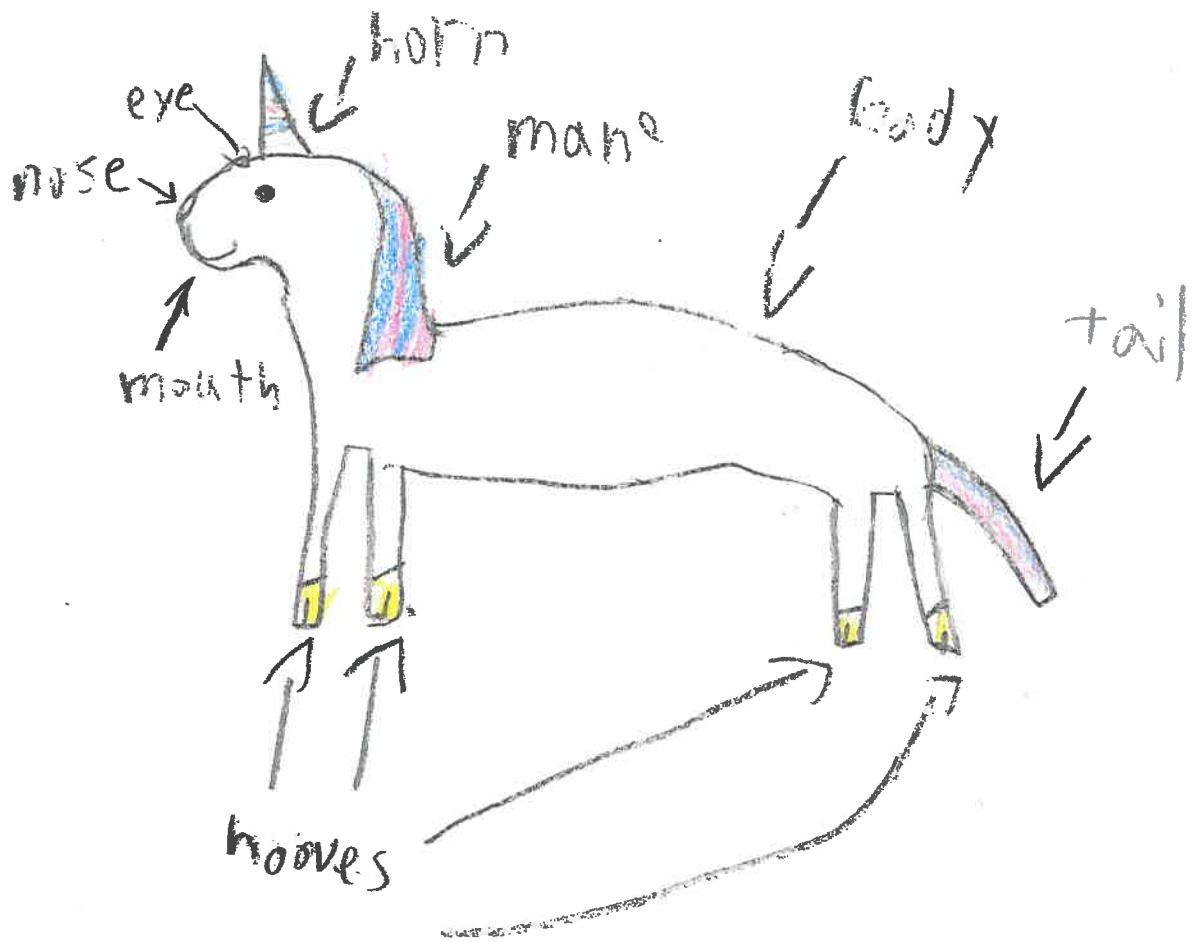

No. I didn't.

12 The last Tiny to attempt was  
17 a young Tiny named Lisa.

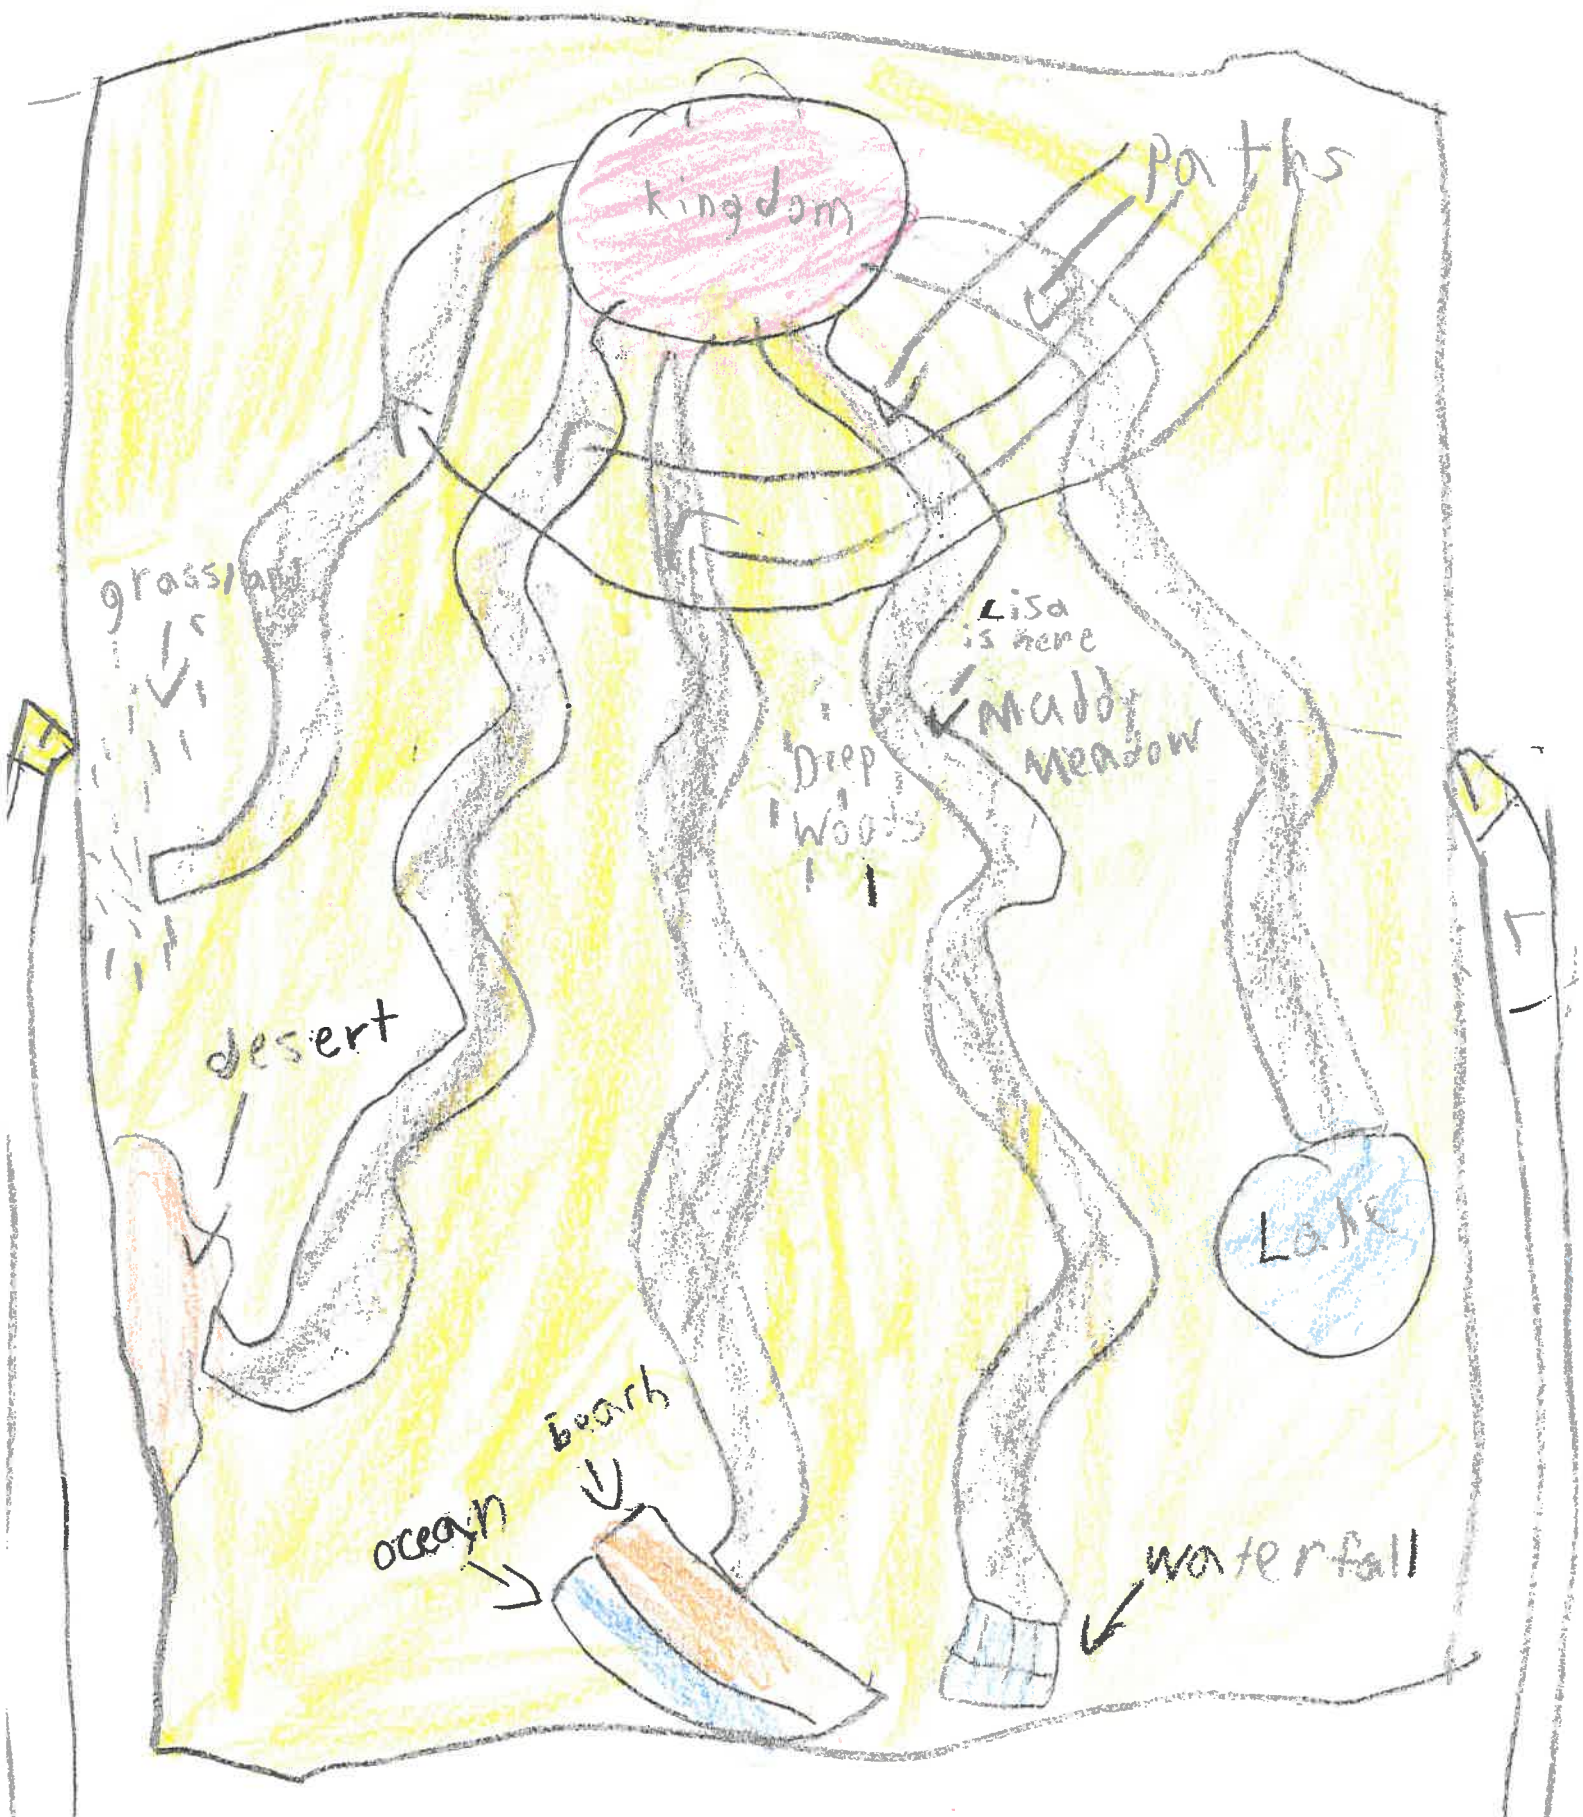

Lisa is a unicorn,  
like the queen.

22 She doubted dinosaurs existed anymore  
28 but she wasn't totally sure, so  
134 she set out to try and  
140 find one. When she left the  
146 kingdom, the quest got hard. The  
151 path became rocky, muddy, and  
157 steep. A thought came to Lisa,  
163 "If this path leads to a  
169 dinosaur, a tiny would have found  
176 it already." Lisa pulled out a map  
182 she had in her pocket and  
189 looked at it. On her right there  
195 was Deep Woods and on her  
200 left there was Muddy Meadow.

# Lisa's Map

206 Muddy meadow was hot, sticky, and  
212 very muddy. Lisa was splattered with  
218 mud after a few minutes. After  
224 hours of walking, Lisa was very  
230 tired, so she decided to take  
236 a nap. Suddenly, Lisa was woken  
244 by a roar. She opened her eyes and  
249 GUESS WHAT?! SHE SAW A  
256 DINOSAUR! she was sure of it. The  
261 creature looked exactly like the  
267 skeleton but with skin. Then Lisa  
270 saw - MORE - DINOSAURS!

275 Though the others didn't look  
280 like the skeleton, she remembered  
285 from history class that dinosaurs  
290 were all different shapes and  
295 sizes. Lisa saw other animals  
302 too; a dragon, a moose, a monster,  
309 a bunny, and a penguin. It was  
314 thought all these creatures were  
320 extinct. "These are probably the last  
326 ones on earth," Lisa thought. After  
331 sharing her discovery, Lisa became  
336 queen and lived happily ever  
337 after.
